PROFILE SUMMARY

MCA student with hands-on experience in web application development, building REST APIs and database-driven applications using Node.js, Express.js, MongoDB, and React.js. Experienced in developing projects involving webhook management and AI-powered financial analysis. Strong foundation in cloud computing, databases, data structures, and software development, with practical exposure to AWS and Docker. NPTEL Cloud Computing certified with 85%, demonstrating a strong understanding of cloud computing concepts and technologies.

EDUCATION

Master of Computer Application (2025-Present)
ABES Engineering College *90.45%*

Bachelor of Computer Applications (2021-2024)
I.I.M.T College Of Management *75.02%*

Intermediate (2019-2020)
Devasthaly Vidyapeeth *68.02%*

High School (10th) (2017-2018)
Devasthaly Vidyapeeth *77.33%*

TECHNICAL SKILLS

Languages: C++, HTML/CSS, JavaScript (ES6+), Python, Java, SQL
Frameworks: React.js, Node.js, Express.js, Tailwind CSS, Bootstrap
Databases: MongoDB, MySQL, PostgreSQL
Tools: Git, GitHub, Postman
Cloud: Docker, Amazon EC2, S3, CloudFront, Redshift, IAM, ELB, Route53, RDS, DynamoDB
Concepts: REST APIs, DBMS, OOP, Data Structures

PROJECTS

AI Personal Finance Advisor | *Python, LangChain, Google Gemini Flash API, yFinance*

- Developed an AI-powered personal finance advisor supporting 2 recommendation domains: savings and investment, with natural-language financial data extraction.
- Designed a modular multi-agent workflow with 5 specialized components for financial calculation, market analysis, savings analysis, investment analysis, and consolidated reporting.
- Integrated yFinance for live market data retrieval and implemented a Planner Agent for dynamic workflow orchestration and personalized financial analysis.

Webhook Manager | *Node.js, Express.js, MongoDB, React*

- Built a centralized webhook management platform with 9 RESTful API endpoints for webhook registration, event management, monitoring, and replay of failed webhook events.
- Developed the backend using Node.js and Express.js, implementing JWT-based authentication and MongoDB/Mongoose data models for managing users, webhook configurations, and event payloads.
- Implemented webhook ingestion through token-based endpoints, storing incoming JSON payloads and delivery status in MongoDB, with a React.js dashboard for event inspection, monitoring, and replay.

CERTIFICATIONS

Cloud Computing (Elite) | 85% | NPTEL (IIT Kharagpur) | 12 weeks
AWS Cloud Practitioner Certification CLF-C02 | Udemy | 14.5 hours
Software Engineer Intern | HackerRank
Python Essentials 1 | Cisco Networking Academy
